

Part Number	Description	Part Number	Description
13001	<p><b>ANTI RUST PROTECTANT</b></p> <p>Specifically formulated to protect all your metal hard parts from rust &amp; corrosion. Prolonged exposure to air causes metal to oxidize which forms rust &amp; corrosion. Rust weakens metal which can cause parts failure. Protect &amp; prolong the shelf life of hard parts.</p> 	4001	<p><b>SYNTHETIC ATF PROTECTANT</b></p> <p>A universal synthetic protectant designed for use with all automatic transmissions. Protectant utilizes synthetic technology used in original equipment manufacturers factory fills. Allows transmission to run cooler, longer &amp; smoother by softening hard shifts, preventing torque converter lock-up shudder &amp; frees sticking valves.</p> 
15001	<p><b>ENGINE PRIMER KIT</b></p> <p>Innovative product was designed as a solution for the problem of dry start-ups in new and rebuilt engines. By injecting primer into the engine block rebuilders, sellers &amp; installers can be assured of reduced internal parts wear caused by dry start-ups. This reduced wear is due to ALL internal parts being properly lubricated before the engine is cranked.</p> 	5001	<p><b>ASSEMBLY LUBRICANT</b></p> <p>Specifically designed for automatic or manual transmission assembly. Lubricates o-rings, gaskets, bearings, bushings, sealing rings, thrust washers &amp; seals during assembly. Unique blue color prevents misdiagnosing leaks. Lube will not melt at shop temperatures up to 135 degrees &amp; is formulated to dissolve quickly at operating temperatures, therefore not clogging filters. Compatible with all transmission fluids.</p> 
2001	<p><b>COOLER FLUSH</b></p> <p>Specifically formulated to prevent automatic transmission cooler contamination (metal shavings, sludge, etc) by propelling a biodegradable cleaner through the transmission cooler &amp; lines with 90lbs of pressure. Patented technology is OEM approved and ideal for installers &amp; ship out transmissions.</p> 	7001	<p><b>VALVE BODY / GOVERNOR CLEANER</b></p> <p>Designed for use in transmissions &amp; other mechanical rebuilds. Anti-seize cleaner is specifically formulated to clean &amp; coat automatic transmission valves &amp; free governors. Improves quality control &amp; reduces costly comebacks.</p> 
3100	<p><b>SURE GRIP CLEAR</b></p> <p>Premium anti-slip epoxy coating that works on hard, smooth or textured surfaces. Anti-slip coating works on interior and exterior surfaces under wet or dry conditions. Chemically resistant to oils, gasoline, water &amp; other solvents. Apply to concrete, steel, wood, fiberglass, aluminum &amp; other surfaces where a slip resistant surface is needed. Easy to use &amp; quick drying.</p> 	9001	<p><b>ELECTRONIC CLEANER</b></p> <p>2-in-1 electronic cleaner (solvent) with Dielectric Protection that instantly removes oil, grease, dirt, flux &amp; other contaminants while leaving a thin layer of dielectric protectant that helps prevent contact failure, voltage leakage and malfunction. Used on electronic transmissions, engines &amp; computers will prolong the life of the connection. Cleaner is harmless to plastics and paper tapes.</p>
